

### Contact Information

**Dr. Sivasrinivasu Devadula/  
Dr. G. L. Samuel/  
Professor N. Ramesh Babu**

Coordinators

STTP on UPMT

Manufacturing Engineering Section,  
Department of Mechanical Engineering  
Indian Institute of Technology Madras,  
Chennai-600 036, India.

Phone: 044-2257 4704/4699/4675

Fax: 044-2257 4652

Email: upmt@wmail.iitm.ac.in

### REGISTRATION

No registration fee will be charged to the teachers of AICTE recognized technical institutions / Engineering Colleges / Universities.

A caution deposit of Rs. 500/- is to be paid by all the applicants, which will be refunded.

This caution deposit should be paid by a crossed demand draft drawn in favour of "IIT Madras", payable at Chennai.

The participants will be paid to and fro 3-tier AC train fare by the shortest route on production of tickets.

**Important Dates**                      **10<sup>th</sup> February, 2018**

Receipt of Registration Form : **25<sup>th</sup> January, 2018**

Intimation of Selection                : **12<sup>th</sup> February, 2018**

Confirmation of Participation: **5<sup>th</sup>-10<sup>th</sup> March, 2018**

### For Further Details

Under  
**Quality Improvement Programme**

Manufacturing Engineering Section  
Department of Mechanical Engineering  
Indian Institute of Technology Madras  
Chennai – 600 036, India.

## Introduction

The Indian Institute of Technology Madras, established by the Government of India in 1959, is among the foremost of Institutes in India and abroad in higher technical education and fundamental and applied research. The Institute, located in a lush green forest covered land of about 250 hectares in South Chennai, has about 565 Faculty, 8300 Students, and 700 Administrative and Supporting Staff working in various departments and centres.

The Manufacturing Engineering Section (MES) was started in 1965 under the Department of Mechanical Engineering. This section is now equipped with state-of-the-art facilities for teaching, training, research and development, and industrial consultancy in various aspects of manufacturing. The facilities available in the section encompass conventional, unconventional and advanced manufacturing technologies. These are grouped under Machine Tool Laboratory, Computer Aided Design (CAD) Laboratory, Computer Aided Manufacturing (CAM) Laboratory, Robotics, CIM Laboratory, Micro Machining and Metrology Laboratory. Since its inception, emphasis has been on practical and industrially relevant developmental activities. The facilities in the section have been augmented with support from Ministry of HRD, Government of India, Indo-German Projects, and Sponsored Projects from various Governmental Agencies and Industries.

## The Background

High accuracy machine tools (ultraprecision and miniaturised machine tools) are in high demand for manufacturing of aerospace, automobile, semiconductor, defence and biomedical components which require higher accuracies and closer tolerances. The target part accuracy depends on the process-machine tool-fixturing-workpiece interactions. In order to maintain the high part accuracy, ultra-precision and micro machine tools need to be designed and analysed for both static and dynamic stability of the total machining system as well as determining the sources of errors and eliminating/compensating them. However, there exists a big vacuum in the area of ultra-precision

machine tool design and manufacturing sector in India. A proper knowledge of various aspects of high precision machine tools is required to carry out R&D activities to fill this vacuum. This course aims at imparting both fundamental and advanced knowledge about various aspects of ultra-high precision machining processes, machine tools, measurement and characterization systems.

## Course Contents

The course will cover the following topics:

- ❖ Introduction to ultra-high precision (UHP) manufacturing
- ❖ Exposure to the industrial requirements
- ❖ UHP machine tools and the detailing on elements: spindles, guide ways, slides etc.
- ❖ Machining process-machine tool interaction on part accuracy
- ❖ Design and development of UHP machine tools
- ❖ Static and dynamic analysis of UHP machine tools
- ❖ Thermal analysis of UHP machine tools
- ❖ Sub structuring machine tools

## Faculty

The faculty will be eminent personalities drawn from IITs, other research organisations and Industries.

## Eligibility

Teachers of AICTE recognized Engineering Colleges are eligible to apply for participation.

## BOARDING AND LODGING

Arrangements have been made to accommodate all the participants in the Taramani guest house at IIT, Madras. Boarding and lodging (twin sharing basis) will be provided to selected candidates.

Short Term Training Programme  
on  
**ULTRA HIGH PRECISION MACHINE TOOLS –  
Design and Characterisation  
March 05 - 10, 2018**

### Registration Form\*

Name (Mr/Ms/Dr/Prof):

Designation :

Office Address :

Tel. Office:

Fax:

Age

Sex

Highest Acad. Qualification :

Professional Experience :

Research Interest :

Accommodation

Demand Draft Details

Amount: Rs.

Date:

Residence:

E-mail:

: \_\_\_\_ Years

: Male / Female

:

:
